# Ph.D. Tangi Migot

## Computational Mathematician

My research interest lies at the interface between theoretical and computational mathematical analysis and includes the following themes.

- **Mathematical Theory:** bilevel optimization; continuous optimization; equilibrium problems (complementarity problems, variational and quasi-variational inequalities); generalized Nash equilibrium problems; Stackelberg games; optimization model with complementarity constraints and cardinality constraints; non-smooth dynamical systems; sparse and large scale optimization.
- **Computational Mathematics:** development of algorithms for degenerate optimization models and equilibrium problems; implementation, complexity, and benchmarking of algorithms; coding of optimization tools in Julia.

These interests are connected, but not limited, to applications in **data science**, equilibrium and kinetics **geochemistry**, **biology** and non-cooperative **game theory**.

From 2015 to 2023, I taught **350hrs** at various levels of the university program both in Europe, in french, and in North America, in english. This includes being **the main lecturer in 4 classes** with above 100 students and the supervision of teaching assistants (8 overall).

My research activities have been supported by research grants in the amount of approx. **30 000CAD** for mobility grants, support to attend summer school and conferences, and organization of a workshop at the Fields Institute. I held a postdoctoral fellowship of **140 000CAD** from IVADO from 2020 to 2022.

## Education

### 2014 - 2017, IRMAR-INSA Rennes

PhD in Applied Mathematics.

**Advisors:** Mounir Haddou (IRMAR-INSA Rennes) and Jean-Pierre Dus-sault (Université de Sherbrooke).

**Title:** Contributions to numerical methods for complementarity problems and mathematical programs with complementarity constraints.

**Reviewers:** S. Adly (Université de Limoges) and C. Kanzow (University of Würzburg).

**Jury:** S. Adly (Université de Limoges), J. Erhel (INRIA Rennes), J. C. Gilbert (Président du jury, INRIA Paris), O. Ley (INSA Rennes) and C. Sagastizabal (Rio de Janeiro).

### 2011 - 2014, INSA de Rouen

Engineer diploma " Génie mathématique".

**End-of-study internship** at INRIA Rennes.

**Title of the thesis:** Mathematical analysis of geochemical models.

**Advisor:** Jocelyne Erhel.

### 2013 - 2014, University of Rouen

Master 2 in Fundamental and Applied Mathematics.

### Contents:

- p.1 Education
- p.2 Positions
- p.3 Publications
- p.5 Teaching and Mentoring
- p.6 Scientific Communications
- p.8 Administrative and Scientific Responsibilities
- p.9 Grants and Scholarships
- p.10 Mathematics Outreach Activities
- p.10 Skills
- p.10 Interests

## Positions

### 10/2022 - 08/2023, Polytechnique Montréal

Research associate in the Department of Mathematics and Industrial Engineering.

**Subject:** Large scale optimization solvers in Julia in the JuliaSmoothOptimizers organization with D.Orban as principal investigator.

Coding of a solver for quadratic models within NOMAD (a solver for derivative-free optimization) supervised by S.Le Digabel.

### 2020 Oct. - 2022 Sep., Polytechnique Montréal

Postdoctoral research associate in the Department of Mathematics and Industrial Engineering financially supported by a grant of IVADO of 140 000 CAD.

**Subject:** Large scale optimization solvers in Julia for data science.  
Principal investigator: D. Orban.

### 2018 Oct. - 2020 Apr., University of Guelph

Postdoctoral research associate in the department of Math. & Statistics.

**Subject:** Generalized Nash equilibrium problems and applications.  
Principal investigator: M.-G. Cojocaru.

Research visits:

- March 2020 (1 week) in Université d'Avignon (France) invited by T erence Bayen.
- March 2020 (1 week) in Universit  de Perpignan (France) invited by Florent Nacry.

### 2018 July. - 2018 Sep., Universit  de Sherbrooke

Postdoctoral research associate financially supported by a grant of excellence for foreign researches from the FRQNT.

**Subject:** Coding a solver for degenerate non-linear optimization problems.

Principal investigator: J.-P. Dussault.

### 2018 Apr. - 2018 Jun., INRIA de Rennes

Postdoctoral research associate in the team FLUMINANCE.

**Subject:** Numerical aspects of dynamical complementarity problems.  
Principal investigator: J. Erhel.

### 2017 Oct. - 2017 Dec., IETR-INSA Rennes

Postdoctoral research associate financially supported by Thales and in a collaboration with IRMAR.

**Subject:** Synthesis and optimization of metasurfaces.  
Principal investigators: R. Loison and R. Gillard.

### 2014 Oct. - 2017 Sep., IRMAR-INSA Rennes

PhD student with teaching over the period (2015 Sep.-2017 Jun.).

Graduate Internships during the PhD:

- **June-July 2017, in Sherbrooke (Canada)** invited by Jean-Pierre Dussault in Universit  de Sherbrooke.
- **Sep.-Dec. 2016, in Sherbrooke (Canada)** invited by Jean-Pierre Dussault in Universit  de Sherbrooke.
- **Nov. 2015, in Beyrouth (Lebanon)** invited by Lina Abdallah in Universit  Libanaise.

### 2014 May - 2014 Sep., INRIA de Rennes

Internship in the team SAGE.

### Coding Julia Packages

My recent contributions are available on Github, <https://github.com/tmigot>. I am an active contributor in the *JuliaSmoothOptimizers* organization, <https://jso.dev>, and the founder of the *Julia Optimization and Variational Analysis* Github organization.

Some registered Julia packages for which I am the lead developer:

1. with A. Montoison, D. Orban and A.S. Siquiera. *ADNLPModels.jl: Implementing the NLPModel API with automatic differentiation*, <https://doi.org/10.5281/zenodo.8166130>, 2023.
2. with D. Orban and A. Soares Siquiera. *JSOSuite.jl: Solve continuous optimization problems with Julia Smooth Optimizers*, <https://doi.org/10.5281/zenodo.7153564>, 2023.
3. with D. Orban and A. Soares Siquiera. *FletcherPenaltySolver.jl: Fletcher's penalty method for nonlinear optimization models*, <https://doi.org/10.5281/zenodo.7153564>.

### Submitted Preprints

1. with M. Haddou, J.-P. Dussault and A. Kadrani. *A unified framework and new regularization methods for degenerate non-linear optimization models* 2023.

### Articles in preparation

1. with D. Orban and A.S. Siquiera. *The JuliaSmoothOptimizers Ecosystem for Linear and Nonlinear Optimization*, 2023.
2. with B. Hamlat and J. Erhel. *A projected dynamical system approach to mineral precipitation-dissolution reactions in geochemistry*, 2023.
3. with M.-G. Cojocar. *Replicator dynamics and the Folk Theorem for generalized games*, 2023.
4. with S. Le Digabel and C. Tribes. *A comparison of solvers for quadratically constrained quadratic subproblems within the mesh adaptive direct search algorithm*, 2023.

### Peer Reviewed Conference Publications

1. with M.-G. Cojocar. *Revisiting path-following to solve the generalized Nash equilibrium problem*, International Conference on Applied Mathematics, Modeling and Computational Science. Springer, Cham, 2019.
2. with L. Abdallah and M. Haddou. *Solving mathematical programs with complementarity constraints with a penalization approach*, World Congress on Global Optimization, pp. 228-237. Springer, Cham, 2019.
3. with L. Abdallah and M. Haddou. *A sub-additive merit function for complementarity problems and application*, Proceedings of the International Conference on Learning and Optimization Algorithms: Theory and Applications. ACM, 2018.
4. with M. Haddou. *A smoothing method for sparse optimization over polyhedral sets*, Springer, Proceedings of the 3rd International Conference MCO 2015 - Part I, 359, pp.369-379, 2015, Advances in Intelligent Systems and Computing.

# Teaching and Mentoring

## Teaching

- **2021-23: 96hrs at Polytechnique Montréal.** Responsible for a course level master/PhD entitled *Methods for optimization and optimal control*, including organization of session projects and laboratories in Julia.
- **2020-21: 18hrs at Polytechnique Montréal.** Laboratory assistant for a course level master/PhD entitled *Methods for optimization and optimal control*, including the design of the laboratories in Julia.
- **2019-20: 48hrs at the University of Guelph.** Responsible for the course MATH 2000 *Proofs, Sets and Numbers*, 36 hrs of lectures, and 12hrs of labs, with 2 teaching assistants. Course for undergraduate students in mathematics (approx. 100 students) introducing mathematical logic, techniques for proofs, and sets. The course uses TopHat active learning tools.
- **2018-19: 56hrs at the University of Guelph.**
  - Guest lecturer in the course *Optimization I*, 8hrs of lectures. Introduction to numerical optimization for graduate students in mathematics;
  - Responsible for the course MATH 2080 *Elements of Calculus II*, 36hrs of lectures, and 12hrs of labs, with 6 teaching assistants. Calculus course for science undergraduate students (approx. 150 students) covering integration techniques, geometry and introduction to differential equations.
- **2017-18: INSA Rennes.** Mentoring of an interdisciplinary project with graduate students.
- **2016-17: 64hrs at INSA Rennes.**
  - Geometry: 48hrs of tutorials with 2nd year undergraduate students;
  - Optimization: 16hrs of labs with graduate students.
- **2015-16: 64hrs at INSA Rennes.** 64hrs of tutorials in bachelor, 1st year calculus.

## Teaching Assistants

- **2019-20:** Supervision of 2 teaching assistants for the class *MATH 2000*. Pavel Zarva and Momina Dar: labs, preparation of the midterms, exams and office hours.
- **2018-19:** Supervision of 6 teaching assistants for the class *MATH 2080*. Thomas Kielstra, Comfort Mintah labs, preparation of the midterms, exams and office hours. Katrina Olfert, Eric Fernandes, Pavel Zarva, David Mammarella: invigilating and grading.

## Master's Internship

- April to June 2017: *Relaxation methods for MPCC*, Cao Van Kien (Université Paris 13). After the master, he completed a PhD entitled *Modèles Multi-leader-follower : analyse théorique, numérique et application aux éco-parcs industriels* in the Université de Perpignan.
- April to June 2017: *Optimization methods for complementarity problems*, Nguyen Dinh Duong (Université Paris Est). After the master, he started a PhD entitled *Quelques résultats sur des modèles de turbulence* in the Université de Rennes.

## Administrative and Scientific Responsibilities

### Organization of Scientific Events

- Organizer of a special session of 7 talks on *Numerical optimization and linear algebra with Julia* at Optimization Days/Journées de l'optimisation 2023 held at HEC Montréal, May 29-31, 2023.
- Organizer of a special session of 16 talks on *Numerical optimization and linear algebra with Julia* at Optimization Days/Journées de l'optimisation 2022 held at HEC Montréal, May 16-18, 2022.
- Co-organizer of the online workshop *dynamics, optimization and variational analysis in applied games* with the Fields Institute in Toronto in Apr. 30-May 1st 2020
- Co-organizer of the session *Continuous optimization and applications* in AMMCS-19 conference in Waterloo (6 talks).
- Co-organizer of the stream *Variational analysis, games and intertwined optimization problems* in EURO 19 conference in Dublin (18 talks).
- Member of the organizing committee of the Groupe de Travail Programmation Mathématique du Groupe de Recherche en Recherche Opérationnel 2016 à Rennes, June 13-14.
- Member of the organizing committee of the conference HJNET 2016 in Rennes, May 30-June 3.

### 2014 - 2017, Administrative Responsibilities

Member of the council of IRMAR-INSA.

## Grants and Scholarships

### 2020, IVADO Canada

Post-doctoral grant of **140 000 CAD** for two years at IVADO (Institute for Data Valorization) on a project called *Large scale optimization solvers in Julia for data science*.

### 2019, Fields Institute

Grant of **10 550 CAD** (6 650 CAD from the Fields Institute and 3 900 CAD from the NSF) for logistical and funding support for workshop *dynamics, optimization and variational analysis in applied games* to be held at The Fields Institute April 30th-May 1st.

### 2019, ICCOPT 19 Berlin

Travel grant of **400€** to attend the conference and the summer school.

### 2019, PGMO Project

Research projet supported in the amount of **6500€**. The project entitled *ORACLE: Optimal Resource Allocation in micro-organisms under Changing Environment* supports 7 french researchers experts in biology, optimal control and optimization.

### 2018, Fonds de recherche du Québec - Nature et technologies (FRQNT)

Post-doctoral grant of excellence for foreign researches from the FRQNT of **12 000 CAD**.

### 2017, Groupe de Recherche en Recherche Opérationnelle

Mobility grant of **700€**.

### 2017, École des Docteurs de l'Université Bretagne-Loire et du Conseil Régional de Bretagne

Mobility grant of **1 000€**.

### 2016, École des Docteurs de l'Université Bretagne-Loire et du Conseil Régional de Bretagne

Mobility grant of **2 000€**.

### 2016, COST/MINO

Grant to join COST/MINO PhD School of **500€**.

### 2014 - 2017, Ministère Enseignement Supérieur et de la Recherche

PhD scholarship awarded by the country state of **68 811,96€**.

## Mathematics Outreach Activities

### 2022, Montréal IVADO/MILA (Canada)

Machine Learning applied to Finance and Insurance - Workshop: Machine learning, deep learning, natural language processing, reinforcement learning and times series forecasting applied to finance (18h).

### 2022, Montréal IVADO/MILA (Canada)

Natural Language Processing Workshop Series. Question answering: Creation of a conversational agent (chatbot) using Rasa by Karine Déry (6hrs).

### 2021, Montréal IVADO/MILA (Canada)

Natural Language Processing Workshop Series. Question answering: from the document to the excerpt. For 2 sessions, Siva Reddy (McGill University - MILA) shared his knowledge and the latest developments in natural language processing in the marketing field (6hrs).

### 2021, Montréal IVADO/MILA (Canada)

6th IVADO/Mila Deep Learning School. School with 45hrs from March 30 to April 29, 2021, with online courses and laboratories on: machine learning, deep learning and optimization - convolutional neural networks, recurrent neural networks - bias and discrimination in AI. By Gaëtan Marceau Caron, Golnoosh Farnadi, AJung Moon, Jeremy Pinto, Mirko Bronzi.

### 2019, Berlin (Germany)

Summer school at the TU Berlin: *Large scale and PDE constrained optimization* par J.-C. De los Reyes and T. Munson, *Optimization and Machine Learning* par P. Richtàrik.

### 2016, Rome (Italy)

COST/MINO PhD School on Advanced Optimization Methods: *Polyhedral Combinatorics* by S. Dey, *Interior Point methods* by J. Castro, *Structured Dantzig-Wolfe Decomposition* by A. Frangioni, *Semidefinite Programming* by V. Piccialli.

### 2016, Nice (France)

SEME (1 week math problem posed by a company) *Re-calibration de modèles pharmacocinétiques* for ExactCure.

### 2014, Rouen (France)

SEME *Modelling Gas Regulators* for GCE group.

## Skills

### Languages

- French (native)
- English (fluent)
- German (academic)

### Programming

- Julia
- Python
- C/C++
- Java

### Scientific Software

- Matlab
- Maple
- Ansys Fluent

## Interests

### Personal

International Master of chess (best elo rating: 2407).

### Contents:

- p.1 Education
- p.2 Positions
- p.3 Publications
- p.5 Teaching and Mentoring
- p.6 Scientific Communications
- p.8 Administrative and Scientific Responsibilities
- p.9 Grants and Scholarships
- p.10 Mathematics Outreach Activities
- p.10 Skills
- p.10 Interests
